VENENO AND AVENTADOR: KING AND FIGHTER

Exotics, It's every boy's fantasy car. To get these beauties you have to have a wallet so thick that you can't even sit on it. These expensive cars are some of the fastest and most beautiful cars ever made with weird names like Veneno and Aventador. These cars are extremely rare to find and two of these beautiful exotics is the Lamborghini Veneno and Lamborghini Aventador.

Built in Italy. Just arrived from the future. Lamborghini has a history of revolutionary thinking. Whether in terms of design. Like the iconic scissor doors. Or in terms of technology such as the V12 engine and carbon-fiber technology. The Aventador LP-700-4 represents whole exotic level of performance. Aventador LP-700-4 with its uncompromisingly crisp contours is the essence of art, poured into extreme inspiring look externally different than other Lamborghini.

Handcrafted in sant'agata bolognese, this V12 engine installed in Aventador main frame engine. This Engine have maximum Horsepower at 700HP. This relentlessly power bring this car 0-60mph only at 2.9 second. Aventador transmission is 4WD drivetrain its mean when aventador accelerate all four wheel are spinning and this fighter have 7 gear ratio. Despite of price, this car is cheaper than veneno only 376,000 USD.

Unlike aventador, veneno is consistently focused on optimum aerodynamics and cornering stability, giving veneno real dynamic experience of real racing car. Inside the car, all interior covered by carbon fiber. The carbon fiber monocoque become visible inside the car in are of the central tunnel and the sills. Two lightweight bucket seats are made from lamborghini's patented forged composite and the lightweight woven carbon-fiber is used to clad entire cockpit, both of seats and headliner. These measure help reduce the weight and increase the driving fun. The engine of veneno is monstrous than aventador its has 750 horsepower. Bring that car even more phantom speed. This king highway is has similar transmission with aventador, but the weight is more lightweight than aventador its only 3,190 lb.

Just like the front end, the rear of veneno has also optimized for underbody aerodynamics and high speed cornering ability. The smooth underbody transitions into substantial diffuser framing the four sizeable exhaust pipes divided by splitter to increase the level of downforce peak and thus the cornering performance. Despite of price, this veneno is most expensive cars in the world. You can buy it after you get 4,106,000 USD.

The screenshot shows a web browser window with the URL twinrev.com/cars/Lamborghini-Veneno-vs-Lamborghini-Aventador#specs. The page displays a comparison between the Lamborghini Veneno and the Lamborghini Aventador across several categories:
